

# Types Of Rings And How To Use Them

## Clicker Rings:

Find the clasp and gently open the ring. Insert and click closed.

## Seamless Rings:

Find the gap and grab each side of the gap. Twist one side up and one side down (  $\uparrow \downarrow$  ). Twist back to close. Do not pull the sides away (  $\longleftrightarrow$  ) from each other as you risk distorting the ring.

## Captive Bead Rings:

The bead pops in and out. It does not thread on. It's held on by tension. To open, grab the ball and wiggle it out. To close, grab the ball and wiggle it in place.
