What if you don't have the style of jewelry I would like?

- -We can always special order jewelry to fit your style. You can set up a consultation to discuss your wants and we can find you options. We require 50% down to place an order, and the other 50% when your order arrives. Jewelry prices will vary.
- -If you'd like your initial piercing done with specialordered jewelry, an appointment will need to be set once the jewelry arrives to ensure time to sterilize your jewelry.
- Can I bring my own jewelry to be pierced with? For your own safety, we do not pierce anyone with outside jewelry. We carry jewelry that we can assure is implant-grade, has been sterilized properly, and is the right size and style for an initial piercing.
- Can I bring my own jewelry for you to change out? Again, to be safe, we would prefer using studio jewelry, especially if your piercing is still healing. You do not want to regress in your healing process or cause a flare up on a healed piercing by using low-quality jewelry. However, if your piercing is healed, we can help you install whatever jewelry you'd like as long as it is appropriate and you are aware and okay with the risks of using outside jewelry.
