

# Professional Child Piercings

Ages 6 Months And 5 Years Old And Up

Friendly And Patient Piercers,  
Hypoallergenic Implant-Grade Jewelry,  
Absolutely No Guns,  
Proper Aftercare,  
Safe Piercings.

Please don't let mall "piercers" torture your children. We get guns are faster, but that's because they cut corners. Guns cannot be properly sterilised and they use cheap sharpened jewelry to tear through the skin. It's more trauma than needs to happen and the jewelry is pokey and uncomfortable. Piercings can also come out crooked or off center. They are not using implant-grade jewelry, proper antiseptic techniques, or proper aftercare. All of these factors cause issues with healing and result in prolonged unnecessary pain for your child. Most often than not, these piercings do not last.

We believe a child's first piercing should be a fun and safe experience that they can be proud of, not something scary and traumatic. So Mars is very excited to provide quality professional piercings for your little ones! We want a good experience for your babies; for their piercings to be in the proper place, with correct angles, done with quality jewelry, and proper aftercare. For them to HEAL.

We'll be there for y'all through the entirety of the healing process to make sure everything goes well. We'll also have bravery certificates, stickers, candy, and prizes for after the piercing!
